

Mathematics Advanced 2024 HSC exam pack

Marking guidelines are developed with the examination paper and are used by markers to guide their marking of a student's response. The table shows each question and the criteria with each mark or mark range. Sample answers may also be developed and included in the guidelines to make sure questions assess a student's knowledge and skills, and guide the Supervisor of Marking on the expected nature and scope of a student's response. They are not intended to be exemplary or even complete answers or responses.
